Ultrasound- and protonation-induced gelation of a carbazole-substituted divinylquinoxaline derivative with short alkyl chain

Kechang Li, Pengchong Xue, Yanbin Shen, Jiayi Liu

PII: S0143-7208(17)32269-6

DOI: [10.1016/j.dyepig.2018.01.010](https://doi.org/10.1016/j.dyepig.2018.01.010)

Reference: DYPI 6484

To appear in: *Dyes and Pigments*

Received Date: 1 November 2017

Revised Date: 8 December 2017

Accepted Date: 6 January 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Graphic abstract

A divinylquinoxaline derivative with short alkyl chain was found to form gel under ultrasound and partial protonation.
