Synthesis of carboline-based host materials for forming copper(I) complexes as emitters: A promising strategy for achieving high-efficiency and low-cost phosphorescent organic light-emitting diodes

Zhenyu Tang, Jun Zhu, Saihu Pan, Zixing Wang, Yanqiong Zheng, Guo Chen, Wenqing Zhu, Bin Wei

PII: S0143-7208(17)31267-6

DOI: [10.1016/j.dyepig.2017.10.028](https://doi.org/10.1016/j.dyepig.2017.10.028)

Reference: DYPI 6326

To appear in: *Dyes and Pigments*

Received Date: 1 June 2017

Revised Date: 16 October 2017

Accepted Date: 16 October 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
