Tailoring the second acceptor unit in easily synthesized ternary copolymers toward efficient non-fullerene polymer solar cells

Lixin Wang, Haifen Liu, Zhaoxiang Huai, Yun Li, Shaopeng Yang

PII: S0143-7208(17)31655-8

DOI: [10.1016/j.dyepig.2017.09.004](https://doi.org/10.1016/j.dyepig.2017.09.004)

Reference: DYPI 6228

To appear in: *Dyes and Pigments*

Received Date: 1 August 2017

Revised Date: 1 September 2017

Accepted Date: 2 September 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Tailoring the second acceptor unit in easily synthesized ternary copolymers toward efficient nonfullerene polymer solar cells

Lixin Wang^{*}, Haifen Liu, Zhaoxiang Huai, Yun Li, Shaopeng Yang^{*}
