

## Accepted Manuscript

Evidence for the production of hydroxyl radicals at boron-doped diamond electrodes with different sp<sup>3</sup>/sp<sup>2</sup> ratios and its relationship with the electro-oxidation of aniline

L. Carolina Espinoza, Adolfo Henríquez, David Contreras, Ricardo Salazar

PII: S1388-2481(18)30066-3  
DOI: doi:[10.1016/j.elecom.2018.03.007](https://doi.org/10.1016/j.elecom.2018.03.007)  
Reference: ELECOM 6172  
To appear in: *Electrochemistry Communications*  
Received date: 24 January 2018  
Revised date: 13 March 2018  
Accepted date: 14 March 2018

Please cite this article as: L. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. Elecom(2017), doi:[10.1016/j.elecom.2018.03.007](https://doi.org/10.1016/j.elecom.2018.03.007)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Evidence for the production of hydroxyl radicals at boron-doped diamond electrodes with different  $sp^3/sp^2$  ratios and its relationship with the electro-oxidation of aniline
