This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Graphatic abstract

Double-Shelled Hollow Carbon Sphere with Microporous Outer Shell towards

High Performance Lithium-Sulfur Battery

Yongzheng Zhang^a, Xiaolin Zong^a, Liang Zhan^{a,b,*}, Xiaoye Yu^a, Jin Gao^a,

The unique microstructures offer the double-shelled hollow carbon sphere with microporous outer carbon shell an ideal sulfur host for high performance Li-S battery.
