Chemically-modified stainless steel mesh derived substrate-free iron-based composite as anode materials for affordable flexible energy storage devices

Bei Long, Hao Yang, Fuxin Wang, Yanchao Mao, Muhammad-Sadeeq Balogun, Shuqin Song, Yexiang Tong

PII: S0013-4686(18)31598-6

DOI: [10.1016/j.electacta.2018.07.097](https://doi.org/10.1016/j.electacta.2018.07.097)

Reference: EA 32294

To appear in: *Electrochimica Acta*

Received Date: 2 March 2018

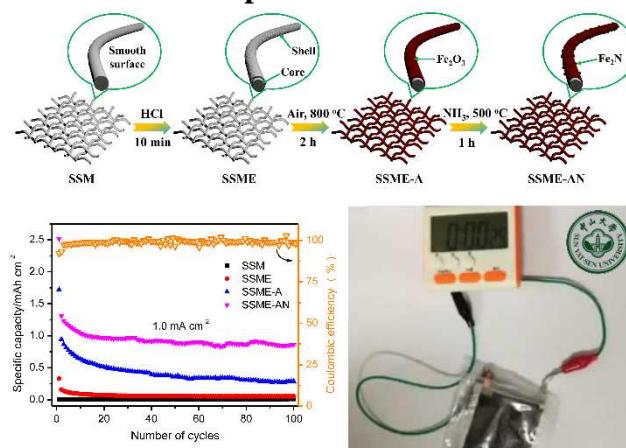

Revised Date: 12 July 2018

Accepted Date: 15 July 2018

Tong, Chemically-modified stainless steel mesh derived substrate-free iron-based composite as anode materials for affordable flexible energy storage devices, *Electrochimica Acta* (2018), doi: 10.1016/j.electacta.2018.07.097.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
