

Accepted Manuscript

Uniform metal-ion flux through interface-modified membrane for highly stable metal batteries

Patrick J. Kim, Kyungho Kim, Vilas G. Pol

PII: S0013-4686(18)31465-8

DOI: [10.1016/j.electacta.2018.06.177](https://doi.org/10.1016/j.electacta.2018.06.177)

Reference: EA 32170

To appear in: *Electrochimica Acta*

Received Date: 25 May 2018

Revised Date: 15 June 2018

Accepted Date: 26 June 2018

Please cite this article as: P.J. Kim, K. Kim, V.G. Pol, Uniform metal-ion flux through interface-modified membrane for highly stable metal batteries, *Electrochimica Acta* (2018), doi: 10.1016/j.electacta.2018.06.177.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Uniform Metal-Ion Flux through Interface-modified Membrane for Highly Stable Metal Batteries
