Tailoring multi-metallic nanotubes by copper nanowires with platinum and gold via galvanic replacement route for the efficient methanol oxidation reaction

N. Naresh, P. Karthik, R. Vinoth, C. Muthamizhchelvan, B. Neppolian

PII: S0013-4686(18)31382-3

DOI: [10.1016/j.electacta.2018.06.094](https://doi.org/10.1016/j.electacta.2018.06.094)

Reference: EA 32087

To appear in: *Electrochimica Acta*

Received Date: 5 January 2018

Revised Date: 12 June 2018

Accepted Date: 13 June 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

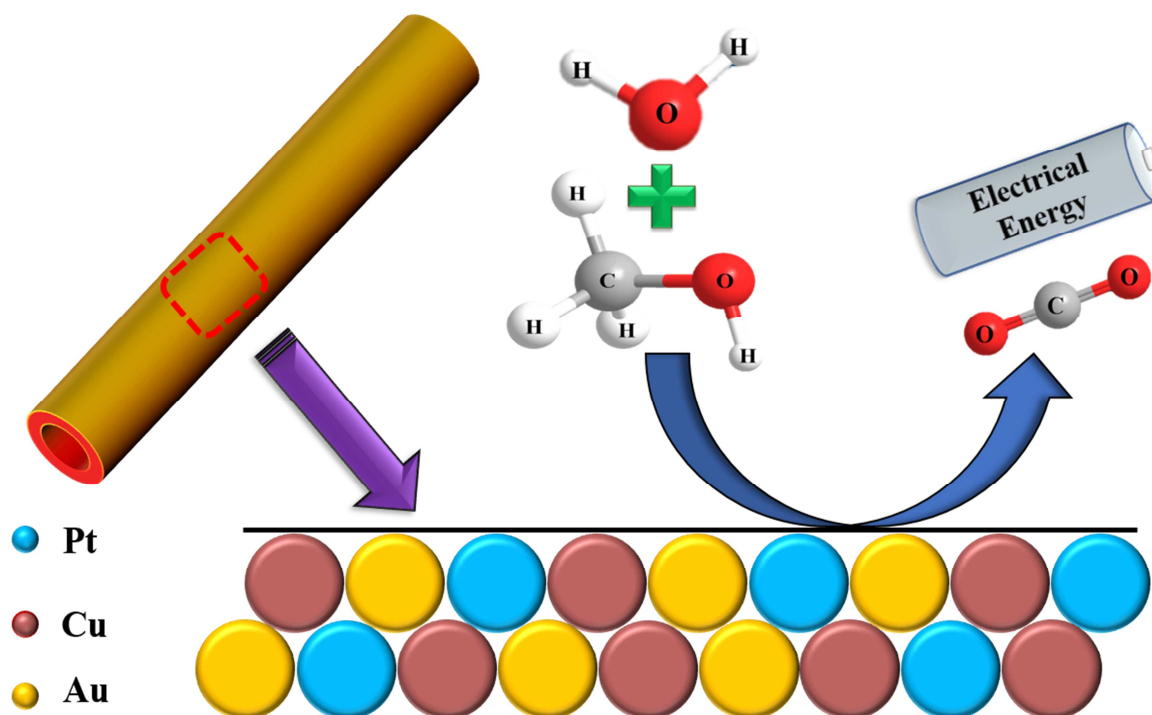

Tailoring multi-metallic nanotubes by copper nanowires with platinum and gold via galvanic replacement reaction for the efficient methanol oxidation reaction
