## Accepted Manuscript

*In-situ* construction of hierarchical accordion-like  $TiO_2/Ti_3C_2$  nanohybrid as anode material for lithium and sodium ion batteries

Chao Yang, Yang Liu, Xuan Sun, Yanru Zhang, Linrui Hou, Qingan Zhang, Changzhou Yuan

PII: S0013-4686(18)30620-0

DOI: 10.1016/j.electacta.2018.03.118

Reference: EA 31484

To appear in: Electrochimica Acta

Received Date: 9 January 2018

Revised Date: 13 March 2018

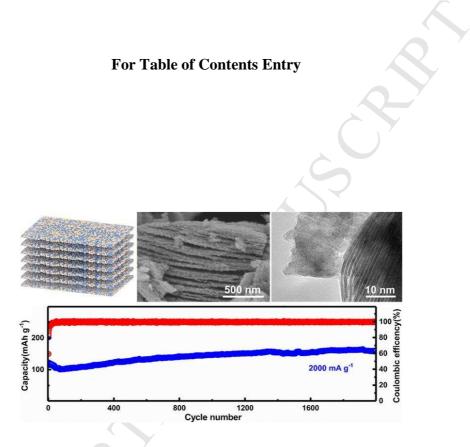

Accepted Date: 19 March 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Hierarchical accordion-like  $TiO_2/Ti_3C_2$  nanohybrid was smartly synthesized, and exhibited striking high-rate capacity and long-term cycling stability for next-generation Na/Li-ion batteries
