This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Graphic Abstract

**Nanosized graphitic carbon with balanced micro/mesoporosity for robust
supercapacitor with superior volumetric capacitance and cyclic
performance**

Chunfeng Xue,^{a*} Fujuan Yang,^a Enyang Wang,^a Lin Feng,^a Xiao Du,^a Xiaogang
Hao^{*a} and Xupeng Li^b

Ultrahigh volumetric capacitance and energy density plus excellent cyclic stability perform in the symmetric supercapacitors based on carbons with intercalated micro/mesopores.
