

Accepted Manuscript

Critical zinc ion concentration on the electrode surface determines dendritic zinc growth during charging a zinc air battery

Jens-Christian Riede, Thomas Turek, Ulrich Kunz

PII: S0013-4686(18)30414-6

DOI: [10.1016/j.electacta.2018.02.110](https://doi.org/10.1016/j.electacta.2018.02.110)

Reference: EA 31305

To appear in: *Electrochimica Acta*

Received Date: 10 December 2017

Revised Date: 20 February 2018

Accepted Date: 20 February 2018

Please cite this article as: J.-C. Riede, T. Turek, U. Kunz, Critical zinc ion concentration on the electrode surface determines dendritic zinc growth during charging a zinc air battery, *Electrochimica Acta* (2018), doi: 10.1016/j.electacta.2018.02.110.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
