

# Accepted Manuscript

The effect of cation chemistry on physicochemical behaviour of superconcentrated NaFSI based ionic liquid electrolytes and the implications for Na battery performance

Matthias Hilder, Patrick C. Howlett, Damien Saurel, Elena Gonzalo, Andrew Basile, Michel Armand, Teofilo Rojo, Mega Kar, Douglas R. MacFarlane, Maria Forsyth

PII: S0013-4686(18)30334-7

DOI: [10.1016/j.electacta.2018.02.052](https://doi.org/10.1016/j.electacta.2018.02.052)

Reference: EA 31247

To appear in: *Electrochimica Acta*

Received Date: 29 August 2017

Revised Date: 5 February 2018

Accepted Date: 10 February 2018

Forsyth, The effect of cation chemistry on physicochemical behaviour of superconcentrated NaFSI based ionic liquid electrolytes and the implications for Na battery performance, *Electrochimica Acta* (2018), doi: 10.1016/j.electacta.2018.02.052.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
