Title: Branched Platinum Nanostructures on Reduced Graphene: An excellent Transducer for Nonenzymatic Sensing of Hydrogen Peroxide and Biosensing of Xanthine

Author: Tapan Kumar Behera Subash Chandra Sahu Biswarup Satpati Bamaprasad Bag Kali Sanjay Bikash Kumar Jena

PII: S0013-4686(16)30584-9
DOI: <http://dx.doi.org/doi:10.1016/j.electacta.2016.03.046>
Reference: EA 26876

To appear in: *Electrochimica Acta*

Received date: 18-1-2016
Revised date: 5-3-2016
Accepted date: 8-3-2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Branched Platinum Nanostructures on Reduced Graphene: An excellent Transducer for Nonenzymatic Sensing of Hydrogen Peroxide and Biosensing of Xanthine.
