Title: Remarkably stable high power Li-ion battery anodes based on vertically arranged multilayered-graphene

Author: Jijeesh R. Nair Gemma Rius Pravin Jagadale Matteo Destro Mauro Tortello Masamichi Yoshimura Alberto Tagliaferro Claudio Gerbaldi

PII: S0013-4686(15)30480-1
DOI: <http://dx.doi.org/doi:10.1016/j.electacta.2015.09.068>
Reference: EA 25701

To appear in: *Electrochimica Acta*

Received date: 21-7-2015
Revised date: 2-9-2015
Accepted date: 13-9-2015

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Remarkably stable high power Li-ion battery anodes based on vertically arranged multilayered-graphene
