

Accepted Manuscript

An improved volume translation strategy for PR EOS without crossover issue

Jialin Shi, Huazhou Andy Li, Wanying Pang

PII: S0378-3812(18)30042-6

DOI: [10.1016/j.fluid.2018.01.034](https://doi.org/10.1016/j.fluid.2018.01.034)

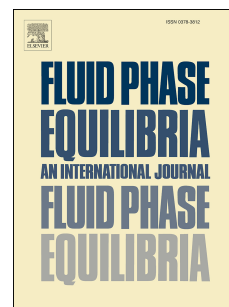

Reference: FLUID 11745

To appear in: *Fluid Phase Equilibria*

Received Date: 18 August 2017

Revised Date: 21 December 2017

Accepted Date: 28 January 2018

Please cite this article as: J. Shi, H.A. Li, W. Pang, An improved volume translation strategy for PR EOS without crossover issue, *Fluid Phase Equilibria* (2018), doi: 10.1016/j.fluid.2018.01.034.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Manuscript Submitted to Fluid Phase Equilibria

Category of Manuscript: Equations of State

An Improved Volume Translation Strategy for PR EOS without Crossover Issue
