A quantum chemistry study for 1-ethyl-3-Methylimidazolium ion liquids with aprotic heterocyclic anions applied to carbon dioxide absorption

Jianqin Hu, Litao Chen, Meiqin Shi, Cheng Zhang

PII: S0378-3812(17)30500-9

DOI: [10.1016/j.fluid.2017.12.016](https://doi.org/10.1016/j.fluid.2017.12.016)

Reference: FLUID 11689

To appear in: *Fluid Phase Equilibria*

Received Date: 7 June 2017

Revised Date: 5 December 2017

Accepted Date: 15 December 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
