Selective reduction leaching of vanadium and iron by oxalic acid from spent V₂O₅-WO₃/TiO₂ catalyst

Wenfen Wu, Chenye Wang, Weijun Bao, Huiquan Li

PII: S0304-386X(17)31002-2
DOI: doi:[10.1016/j.hydromet.2018.05.021](https://doi.org/10.1016/j.hydromet.2018.05.021)
Reference: HYDROM 4827
To appear in: *Hydrometallurgy*
Received date: 7 December 2017
Revised date: 4 April 2018
Accepted date: 26 May 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Selective reduction leaching of vanadium and iron by oxalic acid from
spent V_2O_5 - WO_3 / TiO_2 catalyst
