

## Accepted Manuscript

Volumetric and viscometric study of the ternary (DL-alanine / + D(-)-fructose + water) solution at different temperatures and atmospheric pressure

Farhad Salimi, Farshid Frouzesh

PII: S0021-9614(18)30463-4  
DOI: <https://doi.org/10.1016/j.jct.2018.06.008>  
Reference: YJCHT 5439

To appear in: *J. Chem. Thermodynamics*

Received Date: 14 November 2017  
Revised Date: 31 May 2018  
Accepted Date: 9 June 2018

Please cite this article as: F. Salimi, F. Frouzesh, Volumetric and viscometric study of the ternary (DL-alanine / + D(-)-fructose + water) solution at different temperatures and atmospheric pressure, *J. Chem. Thermodynamics* (2018), doi: <https://doi.org/10.1016/j.jct.2018.06.008>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

# **Volumetric and viscometric study of the ternary (DL-alanine / + D(-)-fructose + water) solution at different temperatures and atmospheric pressure**
