

## Accepted Manuscript

High pressure densities of two nanostructured liquids based on the bis(trifluoromethylsulfonyl)imide anion from (278 to 398) K and up to 120 MPa

Mohamed Dakkach, Félix M. Gaciño, Sofia K. Mylona, María J.P. Comuñas, Marc J. Assael, Josefa Fernández

PII: S0021-9614(17)30379-8  
DOI: <https://doi.org/10.1016/j.jct.2017.10.012>  
Reference: YJCHT 5246

To appear in: *J. Chem. Thermodynamics*

Received Date: 11 May 2017  
Revised Date: 15 September 2017  
Accepted Date: 26 October 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
