Applicability of activated carbon obtained from peach stone as an electrochemical sensor for detecting caffeine

J.J. Arroyo-Gómez, D. Villarroel-Rocha, K.C. de Freitas-Araújo, Carlos A. Martínez-Huitle, K. Sapag

PII: S1572-6657(18)30382-5
DOI: doi:[10.1016/j.jelechem.2018.05.028](https://doi.org/10.1016/j.jelechem.2018.05.028)
Reference: JEAC 4084

To appear in: *Journal of Electroanalytical Chemistry*

Received date: 16 March 2018
Revised date: 21 May 2018
Accepted date: 22 May 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Applicability of activated carbon obtained from peach stone
as an electrochemical sensor for detecting caffeine
