Interfacial characterization and supercapacitive behavior of PEDOT nanotubes modified electrodes

Bruna M. Hryniewicz, Herbert Winnischofer, Marcio Vidotti

PII: S1572-6657(18)30474-0
DOI: doi:[10.1016/j.jelechem.2018.07.008](https://doi.org/10.1016/j.jelechem.2018.07.008)
Reference: JEAC 4158
To appear in: *Journal of Electroanalytical Chemistry*
Received date: 24 April 2018
Revised date: 3 July 2018
Accepted date: 4 July 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Interfacial characterization and supercapacitive behavior of PEDOT nanotubes modified electrodes

Bruna M. Hryniewicz*, Herbert Winnischofer and Marcio Vidotti

Grupo de Pesquisa em Macromoléculas e Interfaces, Departamento de Química, Universidade
Federal do Paraná, CP 19032, 81531-980, Curitiba, PR, Brazil.
