Title: Highly efficient removal of chromium (VI) through adsorption and reduction: A column dynamic study using magnetized natural zeolite-polypyrrole composite

Authors: Nomcebo H. Mthombeni, Sandrine Mbakop, Sekhar Chandra Ray, Taile Leswifi, Aoyi Ochieng, Maurice S. Onyango

PII: S2213-3437(18)30283-5
DOI: <https://doi.org/10.1016/j.jece.2018.05.038>
Reference: JECE 2403

To appear in:

Received date: 16-1-2018
Revised date: 15-5-2018
Accepted date: 20-5-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highly efficient removal of chromium (VI) through adsorption and reduction: a column dynamic study using magnetized natural zeolite-polypyrrole composite
