Title: Optimization and mechanisms of As(III) removal from aqueous solution using Fe-MCM-41 immobilized on GAC

Authors: Kitirote Wantala, Chatkamol Keawbuddee, Suthipong Sthiannopkao, Penradee Chanpiwat

PII: S2213-3437(18)30135-0
DOI: <https://doi.org/10.1016/j.jece.2018.03.014>
Reference: JECE 2255

To appear in:

Received date: 13-11-2017
Revised date: 1-3-2018
Accepted date: 7-3-2018

Please cite this article as: Kitirote Wantala, Chatkamol Keawbuddee, Suthipong Sthiannopkao, Penradee Chanpiwat, Optimization and mechanisms of As(III) removal from aqueous solution using Fe-MCM-41 immobilized on GAC, Journal of Environmental Chemical Engineering <https://doi.org/10.1016/j.jece.2018.03.014>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Optimization and mechanisms of As(III) removal from aqueous solution using Fe-MCM-41 immobilized on GAC
