Title: Analysis of metronidazole removal and micro-toxicity in photolytic systems: Effects of persulfate dosage, anions and reactor operation-mode

Authors: N. Neghi, R.Navneeth Krishnan, Mathava Kumar

PII: S2213-3437(17)30712-1
DOI: <https://doi.org/10.1016/j.jece.2017.12.072>
Reference: JECE 2119

To appear in:

Received date: 9-10-2017
Revised date: 9-12-2017
Accepted date: 31-12-2017

Please cite this article as: N.Neghi, R.Navneeth Krishnan, Mathava Kumar, Analysis of metronidazole removal and micro-toxicity in photolytic systems: Effects of persulfate dosage, anions and reactor operation-mode, Journal of Environmental Chemical Engineering <https://doi.org/10.1016/j.jece.2017.12.072>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

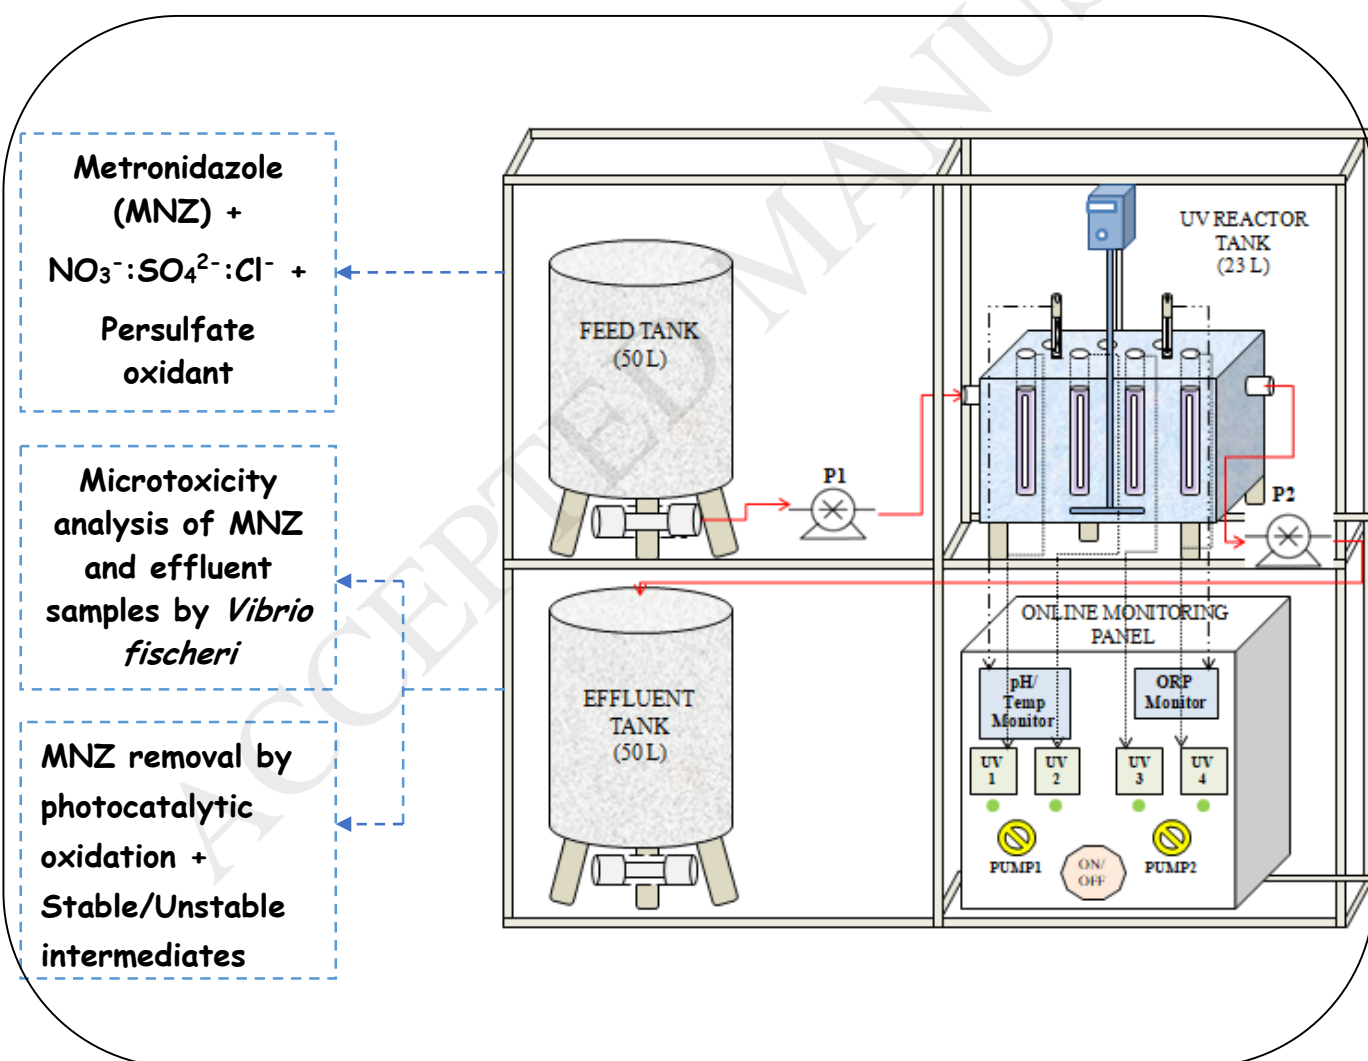

Analysis of metronidazole removal and micro-toxicity in photolytic systems: Effects of persulfate dosage, anions and reactor operation-mode

Neghi. N¹, Navneeth. R. Krishnan¹ and Mathava Kumar^{1*}
