Supercritical carbon dioxide extraction of lycopene from tomato processing by-products: Mathematical modeling and optimization

Tahmasb Hatami, M. Angela A. Meireles, Ozan N. Ciftci

PII: S0260-8774(18)30331-5

DOI: 10.1016/j.jfoodeng.2018.07.036

Reference: JFOE 9350

To appear in: *Journal of Food Engineering*

Received Date: 05 March 2018

Accepted Date: 30 July 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **Supercritical carbon dioxide extraction of lycopene from tomato processing by-**
2 **products: Mathematical modeling and optimization**
