New insights into the apple fruit dehydration process at the cellular scale by 3D continuum modeling

Kevin Prawiranto, Thijs Defraeye, Dominique Derome, Pieter Verboven, Bart Nicolai, Jan Carmeliet

PII: S0260-8774(18)30273-5

DOI: [10.1016/j.jfoodeng.2018.06.023](https://doi.org/10.1016/j.jfoodeng.2018.06.023)

Reference: JFOE 9306

To appear in: *Journal of Food Engineering*

Received Date: 13 November 2017

Revised Date: 1 May 2018

Accepted Date: 24 June 2018

Please cite this article as: Prawiranto, K., Defraeye, T., Derome, D., Verboven, P., Nicolai, B., Carmeliet, J., New insights into the apple fruit dehydration process at the cellular scale by 3D continuum modeling, *Journal of Food Engineering* (2018), doi: 10.1016/j.jfoodeng.2018.06.023.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

New insights into the apple fruit dehydration process at the cellular scale by 3D continuum modeling
