Additive layer manufacturing of semi-hard model cheese: Effect of calcium levels on thermo-rheological properties and shear behavior

Christian Kern, Jochen Weiss, Jörg Hinrichs

PII: S0260-8774(18)30190-0

DOI: [10.1016/j.jfoodeng.2018.04.029](https://doi.org/10.1016/j.jfoodeng.2018.04.029)

Reference: JFOE 9243

To appear in: *Journal of Food Engineering*

Received Date: 28 September 2017

Revised Date: 19 March 2018

Accepted Date: 30 April 2018

Please cite this article as: Kern, C., Weiss, J., Hinrichs, J., Additive layer manufacturing of semi-hard model cheese: Effect of calcium levels on thermo-rheological properties and shear behavior, *Journal of Food Engineering* (2018), doi: 10.1016/j.jfoodeng.2018.04.029.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Additive layer manufacturing of semi-hard model cheese: Effect of calcium levels on thermo-rheological properties and shear behavior**
