Toward Computer-Aided Food Engineering: Mechanistic Frameworks for Evolution of Product, Quality and Safety During Processing

A.K. Datta, Professor

PII: S0260-8774(15)30011-X

DOI: [10.1016/j.jfoodeng.2015.10.010](https://doi.org/10.1016/j.jfoodeng.2015.10.010)

Reference: JFOE 8353

To appear in: *Journal of Food Engineering*

Received Date: 8 April 2015

Revised Date: 12 September 2015

Accepted Date: 5 October 2015

Please cite this article as: Datta, A.K, Toward Computer-Aided Food Engineering: Mechanistic Frameworks for Evolution of Product, Quality and Safety During Processing, *Journal of Food Engineering* (2015), doi: 10.1016/j.jfoodeng.2015.10.010.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- CAE of food can be based on a transport model in a multiphase, multicomponent, deformable porous medium
- Process, quality and safety models can be tied together using frameworks reported
- Modeling community, tools, and complementary experimentation possibilities have reached a critical mass
