Title: Facile strategy toward fabrication of highly responsive self-healing carbon/epoxy composites via incorporation of healing agents encapsulated in poly(methylmethacrylate) nanofiber shell

Authors: Rasoul Esmaeely Neisiany, Jeremy Kong Yoong Lee, Saied Nouri Khorasani, Rouhollah Bagheri, Seeram Ramakrishna

PII: S1226-086X(17)30612-3
DOI: <https://doi.org/10.1016/j.jiec.2017.11.007>
Reference: JIEC 3717

To appear in:

Received date: 29-6-2017
Revised date: 6-11-2017
Accepted date: 6-11-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Facile strategy toward fabrication of highly responsive self-healing carbon/epoxy composites via incorporation of healing agents encapsulated in poly(methylmethacrylate) nanofiber shell
