Title: Feasibility study of a novel copolyamide thin film composite membrane assisted by melamine in terms of acid and thermal stability

Author: Hamzeh Hoseinpour Mohsen Jahanshahi Majid Peyravi Ahmad Nozad

PII: S1226-086X(16)30415-4
DOI: <http://dx.doi.org/doi:10.1016/j.jiec.2016.10.036>
Reference: JIEC 3148

To appear in:

Received date: 4-8-2016
Revised date: 7-10-2016
Accepted date: 27-10-2016

Please cite this article as: Hamzeh Hoseinpour, Mohsen Jahanshahi, Majid Peyravi, Ahmad Nozad, Feasibility study of a novel copolyamide thin film composite membrane assisted by melamine in terms of acid and thermal stability, Journal of Industrial and Engineering Chemistry <http://dx.doi.org/10.1016/j.jiec.2016.10.036>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Feasibility study of a novel copolyamide thin film composite membrane assisted by melamine in terms of acid and thermal stability
