Title: The Effect of Chemical Surface Treatment on the Fracture Toughness of Microfibrillated Cellulose Reinforced Epoxy Composites

Author: Jun-Seok Yeo Oh Young Kim Seok-Ho Hwang

PII: S1226-086X(16)30370-7
DOI: <http://dx.doi.org/doi:10.1016/j.jiec.2016.09.039>
Reference: JIEC 3106

To appear in:

Received date: 5-8-2016
Revised date: 23-9-2016
Accepted date: 23-9-2016

Please cite this article as: Jun-Seok Yeo, Oh Young Kim, Seok-Ho Hwang, The Effect of Chemical Surface Treatment on the Fracture Toughness of Microfibrillated Cellulose Reinforced Epoxy Composites, Journal of Industrial and Engineering Chemistry <http://dx.doi.org/10.1016/j.jiec.2016.09.039>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

The Effect of Chemical Surface Treatment on the Fracture Toughness of Microfibrillated Cellulose Reinforced Epoxy Composites
