Title: Experimental Extraction of L-Carnitine from Oyster Mushroom with Supercritical Carbon Dioxide and Methanol as co-Solvent: Modeling and Optimization

Authors: Sina Radfar, Seyyed M. Ghoreishi

PII: S0896-8446(18)30291-2
DOI: <https://doi.org/10.1016/j.supflu.2018.06.014>
Reference: SUPFLU 4306

To appear in: *J. of Supercritical Fluids*

Received date: 5-5-2018
Revised date: 17-6-2018
Accepted date: 18-6-2018

Please cite this article as: Radfar S, Ghoreishi SM, Experimental Extraction of L-Carnitine from Oyster Mushroom with Supercritical Carbon Dioxide and Methanol as co-Solvent: Modeling and Optimization, *The Journal of Supercritical Fluids* (2018), <https://doi.org/10.1016/j.supflu.2018.06.014>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

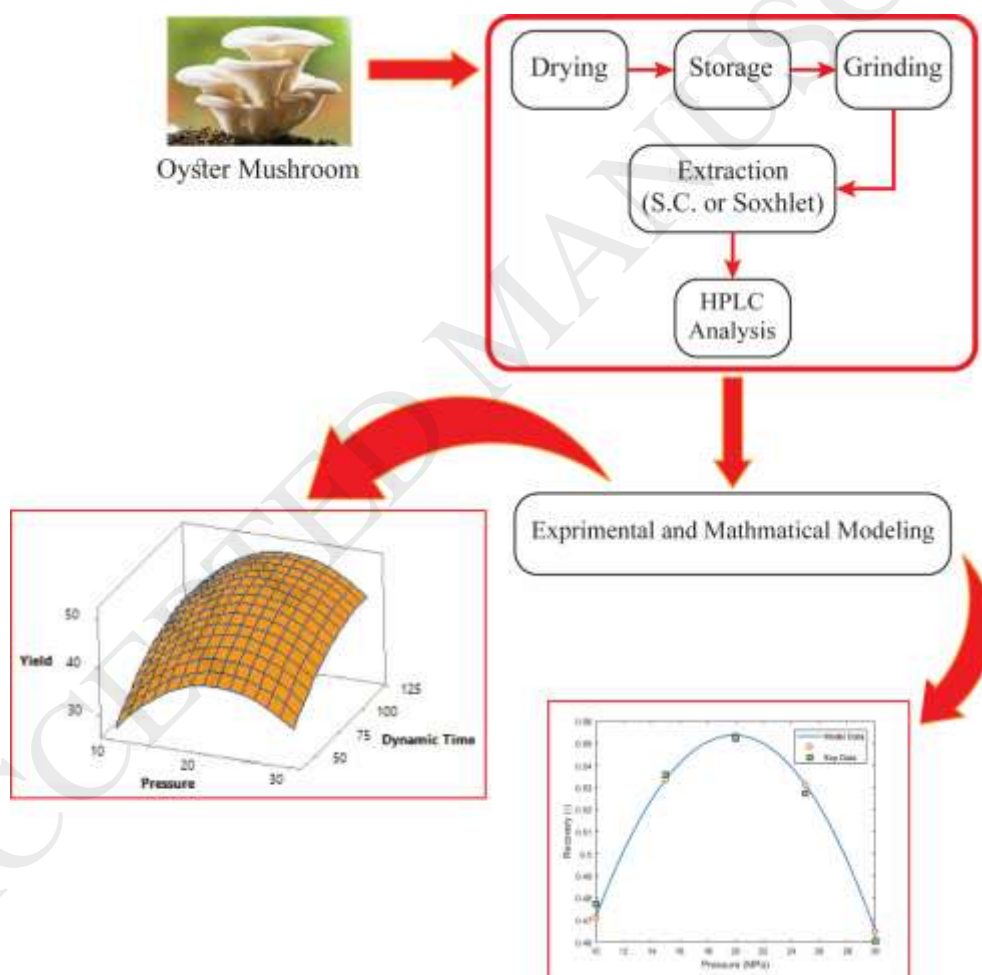

Experimental Extraction of L-Carnitine from Oyster Mushroom with Supercritical Carbon Dioxide and Methanol as co-Solvent: Modeling and Optimization
