Title: Supercritical antisolvent coprecipitation mechanisms

Authors: Valentina Prosapio, Iolanda De Marco, Ernesto Reverchon

PII: S0896-8446(18)30069-X
DOI: <https://doi.org/10.1016/j.supflu.2018.04.021>
Reference: SUPFLU 4261

To appear in: *J. of Supercritical Fluids*

Received date: 2-2-2018
Revised date: 27-4-2018
Accepted date: 27-4-2018

Please cite this article as: Valentina Prosapio, Iolanda De Marco, Ernesto Reverchon, Supercritical antisolvent coprecipitation mechanisms, The Journal of Supercritical Fluids <https://doi.org/10.1016/j.supflu.2018.04.021>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Supercritical antisolvent coprecipitation mechanisms

Valentina Prosapio, Iolanda De Marco*, Ernesto Reverchon

Graphical abstract

HIGHLIGHTS

- Coprecipitated nanoparticles, microparticles, crystals and films produced by SAS;
- competition between jet break-up time and interfacial tension vanishing time;
- influence of vapor liquid equilibria on polymer and active principle coprecipitation.
