This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Carbon dioxide utilization – Electrochemical reduction to fuels and synthesis of polycarbonates

Highlights

- Carbon dioxide capture and storage will boost carbon dioxide utilization
- High pressure electrochemical reduction of carbon dioxide is a developing, but promising technology
- Syntheses of carbonates and polycarbonates from carbon dioxide will find new market opportunities
