Title: A comparison between pressurized hot water and pressurized liquid extraction for optimizing phenolic and antioxidants capacity of the wooden layer between of walnut seed

Authors: H. Kamali, T. Ahmadzadeh Sani, A. Mohammadi, P. Alesheikh, E. Khodaverdi, F. Hadizadeh

PII: S0896-8446(17)30494-1
DOI: <https://doi.org/10.1016/j.supflu.2017.10.017>
Reference: SUPFLU 4075

To appear in: *J. of Supercritical Fluids*

Received date: 18-7-2017
Revised date: 18-10-2017
Accepted date: 19-10-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

A comparison between pressurized hot water and pressurized liquid extraction for optimizing phenolic and antioxidants capacity of the wooden layer between of walnut seed
