Accepted Manuscript

Effect of vibration frequency, size ratio and large particle volume fraction on packing density of binary spherical mixtures

H.A.C.K. Hettiarachchi, W.K. Mampearachchi

PII: S0032-5910(18)30420-0

DOI: doi:10.1016/j.powtec.2018.05.049

Reference: PTEC 13422

To appear in: Powder Technology

Received date: 25 October 2017
Revised date: 13 March 2018
Accepted date: 24 May 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
