

## Accepted Manuscript

New approach to the utilization of microwave thermal energy:  
Desulfurization and decarburization of spent catalyst via  
microwave treatment

Xiaolei Ye, Sivasankar Koppala, Wenwen Qu, Shengming Xu,  
Libo Zhang, Bingguo Liu, Shenghui Guo, Lu Wang

PII: S0032-5910(18)30583-7  
DOI: doi:[10.1016/j.powtec.2018.07.085](https://doi.org/10.1016/j.powtec.2018.07.085)  
Reference: PTEC 13567  
To appear in: *Powder Technology*  
Received date: 3 May 2018  
Revised date: 6 July 2018  
Accepted date: 24 July 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Abstract:** Desulfurization and decarburization processes are key issues in the recovery of valuable metals from spent industrial catalysts because the carbon and
