Leaching behaviour of mechano-chemically activated bio-oxidised refractory flotation gold concentrates

Richmond K. Asamoah, William Skinner, Jonas Addai-Mensah

PII: S0032-5910(18)30233-X
DOI: doi:[10.1016/j.powtec.2018.03.040](https://doi.org/10.1016/j.powtec.2018.03.040)
Reference: PTEC 13271
To appear in: *Powder Technology*
Received date: 15 July 2017
Revised date: 9 March 2018
Accepted date: 18 March 2018

Please cite this article as: Richmond K. Asamoah, William Skinner, Jonas Addai-Mensah , Leaching behaviour of mechano-chemically activated bio-oxidised refractory flotation gold concentrates. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. Ptec(2017), doi:[10.1016/j.powtec.2018.03.040](https://doi.org/10.1016/j.powtec.2018.03.040)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Leaching Behaviour of Mechano-Chemically Activated Bio-oxidised Refractory Flotation Gold Concentrates
