

## Accepted Manuscript

Prediction of critical quality attributes and optimization of continuous dry granulation process via flowsheet modeling and experimental validation

Seo-Young Park, S.C. Galbraith, Huolong Liu, HaeWoo Lee, Bumjoon Cha, Zhuangrong Huang, Thomas O'Connor, Sau Lee, Seongkyu Yoon

PII: S0032-5910(18)30163-3  
DOI: doi:[10.1016/j.powtec.2018.02.042](https://doi.org/10.1016/j.powtec.2018.02.042)  
Reference: PTEC 13218  
To appear in: *Powder Technology*  
Received date: 21 August 2017  
Revised date: 16 February 2018  
Accepted date: 17 February 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

# Prediction of critical quality attributes and optimization of continuous dry granulation process via flowsheet modeling and experimental validation
