Combined effect of chemical composition and spreading velocity of collector on flotation performance of oxidized coal

Yingwei Wang, Yijun Cao, Guosheng Li, Yinfei Liao, Yaowen Xing, Xiahui Gui

PII: S0032-5910(17)30777-5
DOI: doi:[10.1016/j.powtec.2017.09.047](https://doi.org/10.1016/j.powtec.2017.09.047)
Reference: PTEC 12852

To appear in: *Powder Technology*

Received date: 12 May 2017
Revised date: 12 September 2017
Accepted date: 24 September 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Combined effect of chemical composition and spreading velocity of collector on
flotation performance of oxidized coal**
