Mathematical modeling of the capillary rise of liquids in partially soluble particle beds

Martim Victor Hammes, Eduardo Schirmer Heberle, Patricia Rodrigues da Silva, Caciano Pelayo Zapata Noreña, Alexandre Hahn Englert, Nilo Sérgio Medeiros Cardozo

PII: S0032-5910(17)30888-4
DOI: doi:[10.1016/j.powtec.2017.11.019](https://doi.org/10.1016/j.powtec.2017.11.019)
Reference: PTEC 12938

To appear in: *Powder Technology*

Received date: 6 February 2017
Revised date: 4 August 2017
Accepted date: 7 November 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
