Effect of vertical length on asymmetric flow and inclusion transport in vertical-bending continuous caster

Zhongqiu Liu, Baokuan Li

PII: S0032-5910(17)30829-X
DOI: doi:[10.1016/j.powtec.2017.10.034](https://doi.org/10.1016/j.powtec.2017.10.034)
Reference: PTEC 12892

To appear in: *Powder Technology*

Received date: 11 May 2017
Revised date: 21 September 2017
Accepted date: 19 October 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Effect of Vertical Length on Asymmetric Flow and Inclusion Transport
in Vertical-Bending Continuous Caster**
