In situ fluidized hot melt granulation using a novel meltable binder: Effect of formulation variables on granules characteristics and controlled release tablets

Héctor J. Prado, Pablo R. Bonelli, Ana L. Cukierman

PII: S0032-5910(14)00525-7
DOI: doi: [10.1016/j.powtec.2014.05.058](https://doi.org/10.1016/j.powtec.2014.05.058)
Reference: PTEC 10313

To appear in: *Powder Technology*

Received date: 21 August 2013
Revised date: 21 May 2014
Accepted date: 31 May 2014

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

***In situ* fluidized hot melt granulation using a novel melttable binder: Effect of formulation variables on granules characteristics and controlled release tablets**
