Inverse hygric property determination based on dynamic measurements and swarm-intelligence optimisers

Evy Vereecken, Staf Roels, Hans Janssen

PII: S0360-1323(17)30598-X

DOI: [10.1016/j.buildenv.2017.12.030](https://doi.org/10.1016/j.buildenv.2017.12.030)

Reference: BAE 5228

To appear in: *Building and Environment*

Received Date: 15 November 2017

Revised Date: 24 December 2017

Accepted Date: 26 December 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Inverse hygric property determination based on dynamic measurements and swarm-intelligence optimisers
