Enhancement of formaldehyde removal by activated carbon fiber via in situ growth of carbon nanotubes

Shen Yang, Zhenxing Zhu, Fei Wei, Xudong Yang

PII: S0360-1323(17)30439-0

DOI: [10.1016/j.buildenv.2017.09.025](https://doi.org/10.1016/j.buildenv.2017.09.025)

Reference: BAE 5104

To appear in: *Building and Environment*

Received Date: 28 June 2017

Revised Date: 23 August 2017

Accepted Date: 20 September 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **Enhancement of Formaldehyde Removal by Activated Carbon Fiber**
2 **via in situ Growth of Carbon Nanotubes**
