Prediction of Critical Thrust Force for Tubular Composite in Drilling-Induced Delamination by Numerical and Experimental Analysis

H. Hocheng, C.C. Chen, C.C. Tsao

PII: S0263-8223(17)32942-2

DOI: <https://doi.org/10.1016/j.compstruct.2018.07.051>

Reference: COST 9969

To appear in: *Composite Structures*

Received Date: 11 September 2017

Revised Date: 8 June 2018

Accepted Date: 16 July 2018

Please cite this article as: Hocheng, H., Chen, C.C., Tsao, C.C., Prediction of Critical Thrust Force for Tubular Composite in Drilling-Induced Delamination by Numerical and Experimental Analysis, *Composite Structures* (2018), doi: <https://doi.org/10.1016/j.compstruct.2018.07.051>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Prediction of Critical Thrust Force for Tubular Composite in
Drilling-Induced Delamination by Numerical and Experimental
Analysis**

H. Hocheng*, C.C. Chen and C.C. Tsao
