Structure dependent properties of carbon nanomaterials enabled fiber sensors for in situ monitoring of composites

Guantao Wang, Yong Wang, Peipei Zhang, Yujiang Zhai, Yun Luo, Liuhe Li, Sida Luo

PII: S0263-8223(17)34387-8

DOI: <https://doi.org/10.1016/j.compstruct.2018.04.052>

Reference: COST 9606

To appear in: *Composite Structures*

Received Date: 31 December 2017

Revised Date: 15 March 2018

Accepted Date: 12 April 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Structure dependent properties of carbon nanomaterials enabled
fiber sensors for in situ monitoring of composites**
