

## Accepted Manuscript

Time dependent changes of mechanical properties of polymer-based composite materials for adhesive anchor systems

G. Singer, G. Sinn, K. Schwendtner, H.C. Lichtenegger, R. Wan-Wendner

PII: S0263-8223(18)30452-5  
DOI: <https://doi.org/10.1016/j.compstruct.2018.04.076>  
Reference: COST 9630

To appear in: *Composite Structures*

Received Date: 30 January 2018  
Revised Date: 19 April 2018  
Accepted Date: 26 April 2018

Please cite this article as: Singer, G., Sinn, G., Schwendtner, K., Lichtenegger, H.C., Wan-Wendner, R., Time dependent changes of mechanical properties of polymer-based composite materials for adhesive anchor systems, *Composite Structures* (2018), doi: <https://doi.org/10.1016/j.compstruct.2018.04.076>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Time dependent changes of mechanical properties of polymer-based composite materials for adhesive anchor systems**
