This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Title: Prediction of the tensile strength of hybrid polymer composites filled with spherical particles and short fibers

Authors: Hong-Liang Dai^{1,2*}, Zheng-Wei Huang^{1,2}, Chao Mei^{1,2} and Zhong-Yan Lin^{1,2}

Author affiliations:

1. State Key Laboratory of Advanced Design and Manufacturing for Vehicle Body, Hunan University, Changsha, 410082, China
2. Department of Engineering Mechanics, College of Mechanical & Vehicle Engineering, Hunan University, Changsha, 410082, China
