Basic Mechanical Properties of Ultra-high Ductility Cementitious Composites:
From 40MPa to 120MPa

Yao Ding, Jiang-tao Yu, Ke-Quan Yu, Shi-lang Xu

PII: S0263-8223(17)32083-4

DOI: <https://doi.org/10.1016/j.compstruct.2017.11.034>

Reference: COST 9100

To appear in: *Composite Structures*

Received Date: 5 July 2017

Revised Date: 31 October 2017

Accepted Date: 14 November 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Basic Mechanical Properties of Ultra-high Ductility Cementitious

Composites: From 40MPa to 120MPa

Yao Ding¹, Jiang-tao YU², Ke-Quan YU^{3*}, Shi-lang XU⁴

1. Post-doctor researcher, Department of Civil Engineering, Tongji University, China.

2. Associate Professor, Department of Civil Engineering, Tongji University, China.

3. Ph.d candidate, Department of Civil Engineering, Tongji University, China.

Email: zjzjyq@163.com, 12yukequan@tongji.edu.cn.

4. Professor, Department of Civil Engineering and architecture, Zhejiang University, China.
